VILLAGE OF COTTAGE GROVE *NOTICE OF PUBLIC MEETING*

UTILITY COMMISSION

Wednesday, May 13, 2020 **5:00 PM**

AGENDA

Due to the COVID-19 pandemic, this meeting will take place virtually via Zoom. Please join the meeting from your computer, tablet or smartphone by visiting https://zoom.us/j/98721176651. You can also participate via phone by dialing 1-312-626-6799 and use Meeting ID: 987-2117-6651#. When asked for your Participant ID, just press #.

You may also choose to participate by providing public comment prior to the meeting via email to the Director of Public Works & Utilities, JJ Larson at jlarson@village.cottage-grove.wi.us.

1) **Call Meeting to Order**

2) **Quorum and roll call**

3) **Public Appearances** – Public's opportunity to speak about any subject that is not a specific agenda item.

4) **Old Business**
   - **a.** Update on request by property owners to build over sanitary sewer easement.
   - **b.** Update on water and sewer extension along Vilas Rd.

5) **New Business**
   - **a.** Discuss and consider request from Hydrite to install groundwater extraction and monitoring wells in Huston Park.
   - **b.** Discuss and consider expenditure of Water and Sewer Impact Fee funds for the extension of water and sewer on Vilas Rd.

6) **Engineer's report.**

7) **Director's report.**

8) **Approve vouchers for payment.**

9) **Approve the minutes of the February 12, 2020 Utility Commission meeting.**

10) **Set date for next meeting.**

11) **Future Agenda Items**

12) **Adjournment**

Notice:

1. Persons needing special accommodations should call 839-4704 at least 24 hours prior to the meeting.
2. It is possible that members of and possibly a quorum of members of other governmental bodies may be in attendance at the above stated meeting to gather information; no action will be taken by any governmental body at the above-stated meeting other than the governmental body specifically referred to above in this notice.
3. Any item on the agenda is subject to final action

ITEM 5a

PUBLIC WORKS STAFF REPORT

MEMO DATE:	May 8th, 2020
MEETING DATE:	May 13th, 2020
TO:	Utility Commission
FROM:	JJ Larson, Director of Public Works & Utilities
RE:	**Hydrite wells in Huston Park**

BACKGROUND

Hydrite Chemical, acting proactively upon the discovery that a shallow, low concentration groundwater plume existed further northeast than previously known, reached out to nearby property owners and conducted vapor intrusion investigations at the company's expense. No vapor intrusion was detected at any of the properties. In order to ensure that the plume does not migrate further, this plan is proposed for a groundwater extraction well, testing and potential treatment.

OVERVIEW

The proposal included in this packet details the specifics of the plan. Essentially, a well will be installed to pump groundwater from the area for investigation and treatment planning. If contaminants are found at this time, the water would be discharged to our sanitary sewer system. Should on-going treatment be required, additional wells and infrastructure will be installed to pump the water to Hydrite's property for treatment with the treated water then discharged to the storm sewer system.

STAFF RECOMMENDATION

Hydrite's proactive action is in the best interest of the community and the protection of our groundwater. They have always been an extremely cooperative partner in my years with the Village and the proposed plan offers minimal disruption to the park. I recommend approval.

ITEM 5a

Information Concerning Shallow Unconsolidated Deposits Groundwater Extraction Well Proposed for Huston Park

With the 2019 discovery of a shallow, low concentration, groundwater plume extending to the northeast from the Hydrite Chemical Co. (Hydrite) Cottage Grove facility, Hydrite completed vapor intrusion investigations and confirmed that residential homes in that vicinity were not experiencing exposure to vapors from the groundwater contaminants. Out of an abundance of caution and to eliminate any future risks, Hydrite is taking the preventive measure to install a groundwater extraction system to intercept and divert the groundwater flow away from those homes. It will be assumed that the groundwater intercepted by this system may contain contaminants from the facility and the system will include equipment to treat the pumped groundwater prior to discharge. To design this system, Hydrite proposes the following workplan:

Hydrite Chemical Co. proposes to install one groundwater extraction well (EW-165) completed in the unconsolidated deposits in the northeast corner of Huston Park at the location shown on the attached figure (Figure 1). The extraction well will be drilled using a truck-mounted drill rig and support vehicle. Mud matts will be laid down in front of the path of the drill rig as the drill rig mobilizes to and de-mobilizes from the proposed well location to minimize disturbance of the grass in Huston Park. It is anticipated the extraction well will be completed at an approximate depth of 40 feet below ground surface to accommodate the installation of an electric submersible pump in the well and the anticipated drawdown of the water table in the well induced by pumping. The extraction well will be constructed of 6-inch nominal diameter schedule 40 PVC casing and 0.010-inch slot well screen. The screen length will be approximately 35 feet. A schematic diagram of the extraction well is attached. The extraction well will be developed by the drilling subcontractor (Cascade Drilling Technical Services) after installation. The groundwater produced during development will be contained in frac tanks and tested for contaminants. If contaminants are detected, the water would be transported and discharged to the Village of Cottage Grove sanitary sewer at the 110 South Main Street lift station into the same manhole to which the groundwater pumped from the three existing Hydrite Chemical hydraulic barrier system extraction wells is discharged. The discharge to the sanitary sewer would be contingent on receiving approval from the Village of Cottage Grove and Madison Metropolitan Sewerage District (MMSD). It is anticipated the installation and development of the extraction well will take two to three days to complete, weather permitting.

Pumping tests will be performed on the extraction well to determine the radius of influence of the extraction well under various pumping rates, the maximum sustainable pumping rate of the well and the number, if any, of additional extraction wells that should be installed to adequately intercept the shallow groundwater flow beneath Huston Park. Groundwater levels in the extraction well and the temporary monitor wells located in and north of Huston Park will be monitored during the pumping tests to document the radius of influence of the extraction well and estimate the hydraulic properties of the unconsolidated deposits. It is anticipated the groundwater produced during the pumping tests will be discharged to the sanitary sewer contingent on receiving approval from the Village of Cottage Grove and MMSD. The pumping tests should take two to three days to complete.

A second information package will be submitted to the Village of Cottage Grove after the pumping tests are completed. If the data obtained from the pumping tests indicates one or more additional extraction wells are required to capture the shallow groundwater flow beneath Huston Park, the second information package will include a request to approve the installation of the additional extraction well(s). The second information package will also include a figure showing the proposed location(s) of the additional extraction well(s) and the preliminary routing of the extraction well(s) discharge lines and the routing of the treated groundwater effluent line along Trillium Trail for discharge to the storm sewer that discharges to Arrowwood Estates Pond located south of Huston Park (Figure 1). The tentative location of the treatment equipment building near the northeast corner of the Hydrite Cottage Grove facility is shown on Figure 1.

The groundwater pumped from the extraction wells will be conveyed via underground piping to the treatment system building located on the Hydrite Chemical Cottage Grove facility property. The connection of the in-well piping from the submersible pump to the underground piping will be made a minimum of 4 feet below ground surface at the well using a pitless adapter. The treated groundwater will be discharged to the storm sewer that discharges to Arrowood Estates Pond under a general Wisconsin Pollutant Discharge Elimination System (WPDES) permit.

The pump controls and meters and the groundwater treatment equipment will be housed in the treatment equipment building. The wiring to power the electrical submersible pumps in the two extraction wells will be laid in the same underground boring in which the extraction wells discharge piping is installed.

Design plans for the extraction wells pumps and in-well piping, treatment system, underground extraction wells discharge lines and underground treated groundwater discharge line will be prepared and submitted to the Village of Cottage for review and approval before these items are installed. The design plans will be finalized based on the comments received from the Village of Cottage Grove.

Hydrite Chemical would like to install, develop and test the first extraction well in April and May of this year. The additional extraction well(s), if required, will be installed and developed as soon as possible after receiving approval from the Village of Cottage Grove. Completion of the preliminary design plans for the treatment system and horizontal borings is targeted for late August or September with construction to follow as soon as possible after approval or conditional approval of the design plans by the Village of Cottage Grove. It is anticipated construction activities will be completed by the end of November or mid-December and that the extraction wells and treatment system will be brought on-line before the end of the year or in January 2021.

ITEM 6

Engineer's Report | A Review of Projects in the Community

Village of Cottage Grove, WI

PREPARED BY: Kevin Lord PE/PLS
klord@msa-ps.com

DATE: May 2020 Report

MGSD SITE PLAN – MSA was working with the Village on verifying the public utility extensions required for the school district property for the Developers Agreement that was recently signed and approved.

MIRACLE FIELD – MSA was working with the site engineer to verify the site utilities in order for the Village to maintain these in the future.

PHOEBE BAKKEN PARK SPLASH PAD AND SHELTER – The watermain extension was installed according to the plans to the east side of the splash pad for a future loop to Grove Street.

5TH ADDITION TO WESTLAWN ESTATES – Utility work is complete and awaiting good weather for roadway work. MSA is working with MMSD on deed restrictions for future phases at this time.

COTTAGE GROVE COMMONS – Public utility work completed and also working on roadway work as weather permits.

VILAS ROAD SEWER AND WATER – Project has been bid and is awaiting agreement with developer to move forward.

SANITARY SYSTEM FLOWS – MSA has installed flow monitoring equipment in specific manholes in the Village and is monitoring these flows along with inflow and infiltration. The monitoring is anticipated to go through May of 2020 and will then be summarized for flows and drainage basins to provide the Village with planning projects to anticipate in the future and when work may be needed.

GLACIAL DRUMLIN PATH/CLARK STREET – MSA conducted an OPM (Operational Planning Meeting) with Village staff, DOT staff, and utilities to go over the project and anticipated conflicts. Only utility work would be the extension of watermain along Grove Street and looping through Phoebe Bakken Park if the Village were to complete the additional work outside of the grant project. Costs are being prepared by the utilities to bury the overhead along Clark Street.

ITEM 7

Village of Cottage Grove

Department of Public Works

Director's Monthly Report to the Utility Commission

May 13th, 2020

COVID-19

- No two riding in a vehicle at the same time; start/finish times staggered
- Wiping down vehicles before and after use and staying with same vehicle as much as possible.
- Staff that can work from home is as much as possible.

AMI

- 1st quarter reads were done with automatic reads (only a few didn't send, staff got them quickly)
- Now able to do final reads (for owner/tenant changes) entirely from system
- Kristen and I can look up hourly reads for customers to help ID leaks
- In person training & full software implementation is delayed until we can meet in-person
- Core and Main will be providing training on software once it's safe to do so

MMSD charges up in Q1

- Possible aberration in their test results; or the Village wastewater composition is changing.
- Reached out to them to their Collection System Team to discuss and troubleshoot.

Lead & Copper

- Had made great progress on verifying and documenting materials
- As of now; on hold to avoid in-person contact, drop off of sample bottles, etc.
- Awaiting DNR guidance due to COVID-19

UCMR4

- 1st round of test results complete

Vilas Water/Sewer

- Project was bid, waiting on agreement with landowner before the project can start

ITEM 9

VILLAGE OF COTTAGE GROVE UTILITY COMMISSION
MEETING MINUTES OF FEBRUARY 12, 2020

1. **Call to Order.** The meeting was called to order by Chairperson Charlie Rogers at 5:15 p.m.

2. **Determine that a quorum is present and that the agenda was properly posted.** It was determined that a quorum was present and that the agenda had been properly posted. Present were Charlie Rogers (chair), Mike Hackel, Bruce Halverson, Heidi Murphy and Joanna Williams. Also present were Public Works Director JJ Larson, Kevin Lord of MSA, Utility Clerk Kristen Krause, and two (2) members of the public.

3. **Public Appearances – Public's opportunity to speak to Commission Members about any item that is not a specific agenda item.** Nancy Hacker was present to confirm that the Utility Commission had received her application for a zero-lot line for her property on Saint James Street and that everything was in order to proceed. Committee said the application looked complete.

4. **Old Business**
   a. **Update on request by property owners to build over sanitary sewer easement.**
   When speaking with the new Village attorney, Larson was told that it is the property owner's responsibility to draft the language for building over the sanitary sewer easement.

   b. **Update on water and sewer extension along Vilas Road.**
   Lord and Larson have been working on the plans for this project, however, they are not yet finalized. They will be talking with a contractor soon to go over some details. This Friday, they will meet with the developer to go over the plans, as the Village plans to put the project out for bid soon. Work will occur outside of the roadway on this project. Lord asked the committee if they prefer to see the plans again before putting them out for bid, but the committee felt that they did not need to see them until after the bids were received. After some discussion, it was decided to get quotes for both ductile iron and C900 PVC piping for the project. Larson recently spoke with Baker Tilly and was told that the Utility can utilize the impact fee funds for the project; $300,000.00 for the water portion and $250,000.00 for the sewer portion.

5. **New Business**
   a. **Discuss and consider waiving late payment charges to water/sewer accounts.**
   Motion by Hackel, seconded by Halverson, to approve waiving late payment charges in the amount of $584.02 for the water/sewer accounts that were presented. Motion carried with a unanimous voice vote of 5-0-0.

6. **Engineer's Report.**
   Buss Road/Cottage Grove Road Intersection Plan
   Lord will contact the landowners to prepare the improved geometry plans for the intersection. The watermain extension within this project was also discussed. Lord proposed the idea of extending the water main west on Cottage Grove and north up Buss Road for future developments (not specifically the school). This extension is not currently in the plans but could be added as an alternate in the bid for the project.

   5th Addition to Westlawn Estates
   Sanitary utility construction is almost complete and water utility construction should be done by the end of next week. MSA has provided a review of the lift station documents to the Developer.

Cottage Grove Commons
Preconstruction meeting was held and public construction is set to begin the end of February, starting with utilities.

Vilas Road Sewer and Water
The soils report was completed and nothing out of the ordinary was noted. MSA competed the survey of the area and discussed alignments of the path to utilize the existing gravel path and work with the culvert extension along with minimizing wetland impacts. Preliminary plans have been completed and MSA is developing a bidding schedule.

Global Information System
MSA is near completion of the structure measurements of the sanitary and storm system for mapping and capacity calculations. MSA is working on the mapping in order to verify the information from the field. MSA ordered flow meters to install in key sanitary sewer locations to determine the existing flows in Village interceptor sewers. These work items will help determine the level of development whether in the west or north that trigger the need for the farm interceptor.

Gaston Road Hookup Extension
MSA is worked with staff on determining the feasibility of extending water and sewer for a private hookup within the Town of Cottage Grove. Once owners received the cost estimate for extending the service, they decided not to proceed.

Other
MSA recently received the Madison Metropolitan Sewerage District annexation request for the MG School District which needs to be signed by the Village.

Lord also wanted the committee to know that the proposed Miracle Field at Bakken Park had shifted its location recently, which brought up the concern of extending the water main approximately 200 feet to the east to go past the Miracle Field. This extension would allow for water to be ready and accessible for future development in the park.

7. **Director's Report.**

AMI
Big steps have been taken with AMI. Utility Clerk Kristen Krause can now do most meter reads right at her computer, which has been a timesaver. There is still some cleanup of information that requires field work on our end but should be taken care in the next month or so. Core and Main will be providing training on the new software in the coming weeks/month. We are hoping to process the 1st Quarter meter reads utilizing only AMI, and as of present, we are on track to meet this goal.

Well Maintenance Plan
Larson did some research and found that Well 2 was serviced more recently than originally thought. Well 3 is planned to be pulled, inspected and maintained in 2020. Larson also met with the contractor to discuss our generator options. Since the DNR is currently not requiring replacement, we can keep our old generator, which will require some maintenance.

PSC Report
Larson worked with Baker Tilly on the recent annual audit and compiling information for the PSC report.

Lead and Copper
2020 is another year of lead and copper testing, which occurs every three years. This year the DNR has added new requirements; visual verification of the water line material is now required and must be submitted

to the DNR by the end of February. Letters were sent out to all monitoring sites and as of this writing, Larson has been in and verified eleven sites (all copper lines), along with gathering photos to document.

UCMR4

The Village of Cottage Grove was randomly selected as a "small system" to conduct additional unregulated contaminants testing this year. Kits and testing are paid for by the EPA. We will be collecting our first round (of 2) in the coming weeks.

Work with MSA

Larson met with Lord and James Bongard of MSA to ensure that the Village and MSA are on the same page with ongoing/upcoming projects. They are also planning on looking at and updating the Village's construction specs. The water/sewer extension along Vilas Road is also progressing with the help of MSA; soil samples have been completed.

8. **Approve vouchers for payment. Motion** by Rogers, seconded by Murphy, to approve payment of the vouchers in the amount of $275,648.84. Motion carried by a unanimous voice vote of 5-0-0.

9. **Approve the minutes of the December 11, 2019 meeting. Motion** by Halverson, seconded by Hackel, to approve the minutes of the December 11, 2019 meeting as presented. Motion carried by a unanimous voice vote of 5-0-0.

10. **Set next meeting date.** The next meeting of the Utility Commission will be held on Wednesday, March 11, 2020 at 5:00 p.m. at the Municipal Services Building.

11. **Future agenda items.**
    - No specific items listed.

12. **Adjournment. Motion** by Murphy, seconded by Hackel, to adjourn the meeting at 5:58 p.m. Motion approved by unanimous voice vote, 5-0-0.

Respectfully submitted by Kristen Krause, Utility Clerk

Approved on: ____/____/____
