

# How Flock Helps Solve Missing Person and Human Trafficking Cases

Across the country, Flock Safety's License Plate Reader (LPR) cameras have helped **reunite over 1,000 missing persons with their families and break up human trafficking rings.**

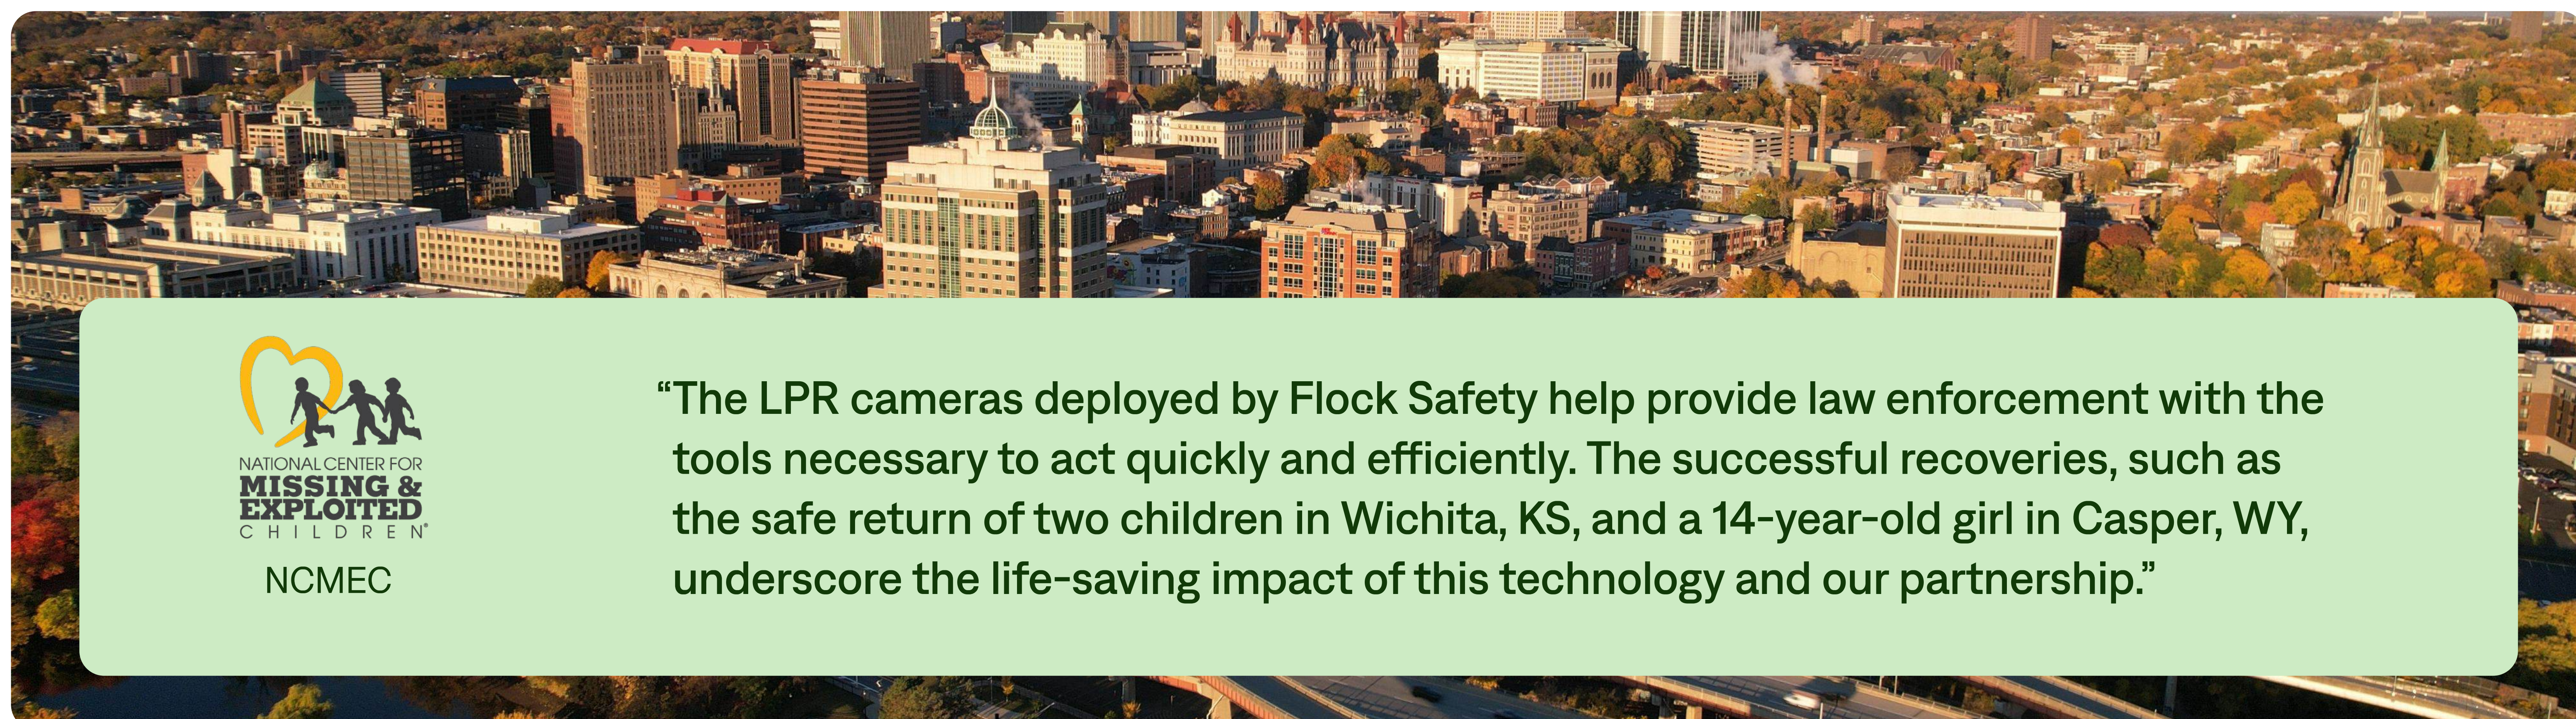

Flock is proud to partner with the **National Center for Missing and Exploited Children**, the nation's largest and most influential child protection organization.

Flock Safety aims to **eliminate human trafficking and child abduction.** Our LPR cameras help law enforcement hold kidnappers and human traffickers accountable, **providing essential evidence and real-time alerts to reunite survivors with their families.**

## What are License Plate Readers?

Flock Safety LPR cameras **detect plate characters and vehicle features**, including the vehicle's make/model and color with Flock's Vehicle Fingerprint® technology. These additional details provide law enforcement with actionable leads to find kidnapped children, **even if a license plate is stolen, removed, or swapped.**

“The LPR cameras deployed by Flock Safety help provide law enforcement with the tools necessary to act quickly and efficiently. The successful recoveries, such as the safe return of two children in Wichita, KS, and a 14-year-old girl in Casper, WY, underscore the life-saving impact of this technology and our partnership.”

WHEN EVERY SECOND MATTERS

74% of AMBER Alert cases are resolved within six hours, and 93% within 24 hours.

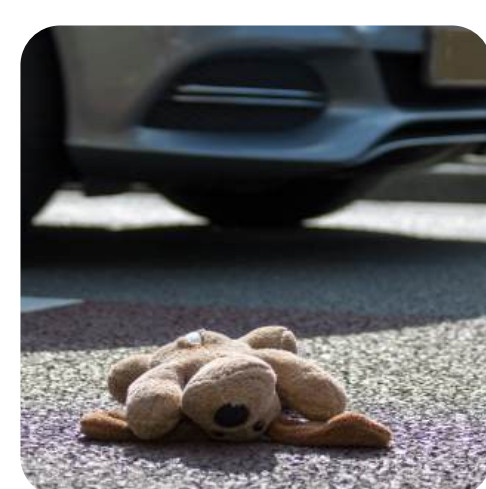

These numbers highlight the critical importance of timely intervention. The LPR cameras deployed by Flock Safety help provide law enforcement with the tools necessary to act quickly and efficiently.

## Reuniting Families Across the U.S.

### FLOCK LICENSE PLATE READERS USED TO DISMANTLE CHILD TRAFFICKING RING IN TAYLOR

“Police talked with the predators and told them where to meet up - that’s when the Flock camera system comes into play. **“This system is locating wanted people, bad people, in society. And it’s giving us another set of eyes,”** said Adamisin.”

### KALAMAZOO POLICE SAVE CHILD, QUICKLY ARREST SUSPECTED KIDNAPPER

“A Kalamazoo County resident is facing multiple felony charges after being arrested for kidnapping a 3-month-old child. With the help of Flock Safety Falcon® LPR cameras, the Kalamazoo Department of Public Safety (KDPS) in Michigan was able to **quickly locate the suspect – within 25 minutes – and safely reunite the child with his mother.**”

### FLOCK CAMERAS HELP FLORENCE POLICE ARREST KIDNAPPING, DOMESTIC VIOLENCE SUSPECT

“Florence officers received an **alert from the Flock camera system about a man wanted for kidnapping and first-degree domestic violence.** The alert allowed police to narrow their search and quickly locate the suspect. “This is yet another example of how **proactive policing and advanced technology can work together to keep our community safe,**” the Florence Police Department said in a statement.

### RECOVERY OF KIDNAPPED CHILD SPOTLIGHTS AMBER ALERT PROCESS, FLOCK CAMERAS

“Elizabethtown police were able to **recover the stolen vehicle, which had a 7-month-old girl inside, within about an hour of the abduction.**”

## Safety That Reflects Your Community’s Values

### YOUR COMMUNITY OWNS THE FOOTAGE

Customers own 100% of all data captured on our devices. We never sell data for commercial purposes or share it without express customer permission.

### BUILT IN TRANSPARENCY AND ACCOUNTABILITY

Flock provides a transparency portal free of charge so your community can see how the devices work on an ongoing basis. We require a **documented search reason or case number every time a user accesses Flock data, creating a permanent audit trail for every user.**

### ENSURING PRIVACY

**All data is automatically deleted every 30 days, by default.** All images and metadata are encrypted in the cloud for maximum security compliance. In addition to being certified by the FBI’s Criminal Justice Information Services (CJIS), we are NDAA, SOC2 (Type II), SOC3, ISO 27001, Higher Education Community Vendor Assessment Tool (HECVAT), HIPAA, and FERPA-compliant. We are also aligned with the security protocols established by NIST Cybersecurity as well as the Cloud Security Alliance’s CAIQ framework.
