

Acceptance for EBOW project: Engaging Beyond Our Walls

The Library Board received the National 2023 EBOW: Engaging Beyond our Walls Project Grant which is supported by the Institute of Museum and Library Services, the Washington DC Public Library, Playful City Lab and American University Game Center. The EBOW project seeks to explore a new role for public libraries as hubs for making neighborhood games and interactive stories using our local history and landmarks. The overall goal of this work is to increase the voice of residents in telling interactive stories, especially tied to local history and the public good.
